

Chain blocks | MKT Plus | 5.000 kg

- The chain hoist in the MKO and MKT Plus series have a steel construction. The steel construction is an impact resistant cover that provides durability and protection.
- The hoists have a powder coating which provides a long-lasting finish in hostile environments.
- A unique design which enhances performance, safety and reliability.
- Thrust bearing, allows easy rotation of the load while suspended and prevents chain twisting.
- Forged alloy steel hooks cast steel safety latches.
- The plus serie chain blocks have guide rollers to guide the chain through the block. With the guide rollers, the chain will pass smoothly through the hoist.

Difference between MKO Plus and MKT Plus

The MKO plus series chain blocks have overload protection. Overload protection on a hoist prevents overloading the hoist. As a result, you immediately save costs, the hoist has a longer lifespan, and you work safer.

Type	MKO -MKT Plus
Brand	Mitari
Finish	Powder coating
Lifting direction	Vertical
Hooks	Swivel top and bottom hooks
Chain falls	2
Chain length	Available from 3 meters
Chain	Electro-galvanized T-hardened
Control chain	5 x 25 mm Electro galvanized
Temperature range	-10 °C to +40 °C
Norm hoist	NEN-EN 12100-1/2
Norm chain	ISO 3077 EN 818-7
HS Code	8425190000

WLL kg	Chain size mm	A mm	B mm	C mm	D mm	E mm	F mm	G mm	H mm	I mm	Weight kg
